ABOUT OUR COMPANY

Gondwana Mining Management & Services Ltd is one of the emerging and pioneering companies in the field of mining operations management and integrated logistical and technical services in Africa.

The company was established in Kigali – Rwanda in 2025 to serve as an administrative and organizational hub for mining projects across Africa, particularly in Sudan, South Sudan, Central African Republic, Chad, Cameroon, Angola, Gabon, and others.

The company relies on a team of highly qualified geologists, engineers, and technicians, striving to deliver professional field solutions that ensure maximum efficiency and productivity.

Provide innovative and sustainable geologic consulting and exploration services that maximize resource value for our clients

FOUNDER'S ACHIEVEMENT

The four founding partners of Gondwana Mining Management & Services Ltd. possess extensive experience and notable achievements in the development of mining projects across Africa. Their combined expertise has established a solid foundation for the company's success. Among their key accomplishments are the following:

1. Development of Mining Projects in South Sudan:

The partners successfully developed the mining concession operated by Waco Company in partnership with Lian Company, transforming it from traditional artisanal mining into a modern mechanized operation. This transition led to increased production and improved operational efficiency.

2. Transformation of Mirro Company's Activities into Integrated Mechanized Mining:

The team played a major role in converting Mirro Company's concession in the Republic of South Sudan from traditional methods to organized industrial-scale mining using the latest technologies.

3. Geological Exploration and Prospecting:

The partners conducted geological exploration and research in Kilimanjaro Company's concession area in South Sudan, including detailed geological studies to assess ore reserves and identify potential future production indicators.

4. Pioneering Mining Projects in the Great Sahara:

The partners were among the first to initiate mechanized mining projects in the challenging environments of the Great Sahara, demonstrating exceptional field expertise in logistics and operations under extreme conditions.

OUR VISION

To be Africa's leading platform in managing and operating mining projects — combining technical expertise and administrative professionalism to achieve sustainable and high-quality production.

OUR MISSION

To provide integrated field and logistical services in the mining sector through specialized teams dedicated to achieving efficiency, transparency, and operational safety, serving both local and international partners.

OUR CORE VALUES

- Integrity and credibility in work.
- Technical and field competence.
- Continuous innovation in technical solutions.
- Teamwork and partnership spirit.
- Environmental respect and sustainable production.

COMPANY SERVICES

- **Mine Management:**

Comprehensive supervision of mining and production operations ensuring operational efficiency.

- **Logistics Services:**

Transportation of heavy machinery and equipment and provision of on-site field support.

- **Geological Exploration and Surveying:**

Execution of geological mapping, sample collection, and mineral resource assessment.

- **Integrated Mining Services:**

Supplying production inputs, preparing work sites, and maintaining field equipment

EXPERTS AND TEAM

SHORT STORY ABOUT OUR TEAM

At the heart of Gondwana Mining Management & Services Ltd stands a team of professionals whose experience defines our strength.

Our experts come from diverse fields of geology, engineering, and mine operations — united by one mission: to build a new standard of excellence in Africa's mining sector.

Eng. Mohammed Ibrahim Omer Ali:

Geologist and specialist in mineral exploration and prospecting operations.

Al-Sadeq Osman Adam Suliman:

Expert in processing plant design and field exploration operations.

Ezeldin Ibrahim Omer Ali:

Expert in mineral processing and design of smelting and extraction systems.

Mohammed Osman Ahmed Abdalrhman:

Specialist in resource management and strategic planning for mining projects.

OPERATIONAL APPROACH

Establishment and Management in Rwanda:

The partners founded Gondwana Mining Management & Services Ltd in Kigali – Rwanda and obtained official authorization to open seven branches across African production countries, in addition to an administrative and commercial branch in Dubai to facilitate international operations and global marketing of gold and minerals.

Gondwana focuses on direct on-site operations within potential mining areas. The company's members possess vast field experience gained through many years of exploration and fieldwork in challenging terrains.

Gondwana does not rely on media publicity to attract investors; instead, it demonstrates capability and performance through tangible field results.

The company believes that funding is not a prerequisite to start operations, but rather a tool to expand production and maximize returns. Gondwana welcomes strategic partnerships with those who share its vision and legal principles based on transparency, discipline, and hard fieldwork.

OPERATIONAL MATERIALS

Gondwana Mining Management & Services Ltd is committed to using high-quality, eco-friendly materials throughout our gold extraction and mineral processing operations. We utilize Jacobi Activated Carbon, known for its exceptional adsorption capacity and performance in gold recovery processes, ensuring maximum extraction efficiency. In addition, we employ the Jinchan Gold Ore Dressing Agent, an environmentally friendly alternative to cyanide, designed to achieve effective gold leaching while minimizing ecological impact and promoting workplace safety. Our careful selection of reagents and processing materials reflects our dedication to sustainable mining practices, product quality, and environmental responsibility across all operational stages.

AREA OF OPERATIONAL

EQUIPMENT & MACHINERIES

Gondwana Mining Management & Services Ltd operates with a reliable fleet of modern equipment and machinery designed to meet the diverse demands of mining and exploration activities. Our assets include excavators, loaders, dump trucks, drilling machines, and field support vehicles—each maintained to the highest operational standards to ensure safety, efficiency, and sustainability. In challenging terrains where conventional transport is limited, we deploy motorbikes and adaptable light equipment to facilitate movement and material handling. This strategic combination of machinery and mobility solutions allows us to maintain productivity, minimize downtime, and support consistent project delivery across all operational sites.

TRANSPORTATION & LOGISTICS

Efficient transportation is a key element in our mining operations. Gondwana Mining Management & Services Ltd recognizes the logistical challenges posed by remote exploration areas, where infrastructure and road access may be limited. To ensure smooth and continuous operations, we employ a combination of transportation methods suited to each terrain. In areas accessible by road, we utilize light and heavy-duty vehicles for mineral and equipment movement. In locations where vehicles cannot reach, we rely on motorbikes and other adaptable means to safely transport mineral samples, gold, and essential supplies. This flexible approach enables us to maintain productivity, reduce delays, and ensure the secure delivery of materials from the field to processing or storage facilities.

NETWORK AND HEADQUARTER

Headquartered in **Rwanda**, the company drives growth and innovation through an active partnership network across Sudan, South Sudan, Chad, the Central African Republic, Cameroon, and Angola — with exciting plans to extend its reach into the dynamic markets of the Horn of Africa and Sahel regions.

EXPLORATION & AREA RESEARCH

At Gondwana Mining Management & Services Ltd, our exploration process begins with detailed area research aimed at identifying regions with high mineral potential. Through geological mapping, geochemical sampling, and geophysical surveys, our team analyzes terrain structure and mineral indicators to locate gold and other valuable resources. The first production results were successfully obtained from the **Square Waco** site, a project developed in collaboration with our partners in **Dubai**. This partnership reflects our commitment to combining local geological expertise with international experience to ensure accuracy, efficiency, and sustainable growth in all our mining ventures.

MINERAL GALLERY

Our Mineral Gallery highlights the rich geological potential of Africa through samples collected from Gondwana Mining's exploration sites. Each mineral reflects our commitment to responsible resource development, innovation, and sustainable growth across the continent.

OUR COMMITMENT

Gondwana Mining Management & Services Ltd seeks to build a successful African model of responsible investment in the mining sector by combining geological expertise with modern management, becoming a trusted partner in developing mineral resources and supporting the growth of local communities.

THANK YOU

WE ARE READY TO ASSIST YOU

Thank you for considering Gondwana Mining Management & Services Ltd. We are committed to delivering exceptional geological expertise and look forward to the opportunity to partner with you on your next project.
